Subject: Penalties? What penalties?

The current settlement proposed for Microsoft is a travesty. In my mind it corresponds to letting a killer free from death row and giving him a coupon for a free assault rifle.

The appearance is that Microsoft has purchased both the Executive and Legislative branches of the federal government and the Judicial branch is powerless. In five years Microsoft will own all media outlets and the internet and totally control public opinion. I don't fear the Taliban, but Microsoft scares me to death.
